EXPERIENCE

FRONTEND DEVELOPER - NONOTEPAD

Design and develop from scratch a note-taking app for Windows. Build a product website to show and distribute the app. The app is meant to be similar to Windows native Notepad but dark themed. Keep the app as native as possible using integrated Electron methods and NodeJs modules. Develop using AI and keep the best performance possible within the limitations of the technologies chosen for development.

Skills: JavaScript, NodeJs, Electron, ChatGPT, Sass, Hosting Services, Git, Github.

JANUARY 2023

FRONTEND DEVELOPER - BLUE ASESORAMIENTO E INVERSIONES

Design, development, publish and maintain website. The website must show the available real estate properties of the company and share information and images with a friendly UI. Improve SEO via HTML and improve performance using best practices and Lighthouse.

Skills: React, Sass, NodeJs, Sass, JavaScript, Hosting Services, Git, GitHub, Figma.

SEPTEMBER 2022

FULLSTACK DEVELOPER - REVIENS

Develop administrative software with an integrated database and an intuitive interface for restaurant management. Modify the database, include and delete products from tables, automatically keep track of quantity of products and calculate each table bill.

Skills: NextJs, React, SQL, SQLite, NodeJs, Electron, Prisma, Sass, Git, Github.

APRIL 2022

CAREER OBJECTIVE

Frontend developer with special appetite for UX and UI design based in Argentina. Interested in Marketing, Design and AI. Capable of solving problems autonomously and bringing core value to products. Willing to learn new technologies and skills. Desire to meet and work with talented people with a strong sense of creativity and judgment. Eager to develop teams and unique products.
